I take this opportunity to welcome you on behalf of the Board of Directors to this 44th Annual General Meeting of your Company and to present you the Audited Accounts for the year 2016 – 2017 and Auditors' and Directors' report thereon.

Despite expectation of the improvement in gas supply availability, pressure problem is continuing for last few years unabated although improvement in electricity supply has taken place. There are power cuts and we are not able to generate adequate electricity from our generators as gas is still in short supply.

Our endeavour to hold on to our advantages built up over the years are still continuing. We are confident that as soon as the global scenario improves further and confidence returns in our own ability to perform under difficult situations we will be able to take full advantage of the market.

# **SOCIAL COMMITMENT**

In Beximco, we believe in our responsibilities towards the society we operate in. All our activities are therefore directed to the wellbeing of the society in general. # **DIRECTORS' REPORT**

FOR THE YEAR 2016-17

# Dear Shareholders.

The Directors have pleasure in submitting hereunder their report together with the Audited Accounts of the company for the year July 1, 2016 to June 30, 2017 and Auditors' Report thereon:

Pursuant to the Directive issued by the Bangladesh Securities and Exchange Commission (No. SEC/SRMIC/2011/1240/445) dated April 27, 2016 to follow July – June as income year with effect from July 01, 2016 in compliance with the provision of the Finance Act 2015, the company has adopted the change in this financial year.

# **Analysis of Operating Performance**

# Business Outlook - a general overview

The vertical manufacturers like Beximco having world class facilities will have the advantage over other producers in the long run. Under the new Zero Tolerance Compliance requirements both building and fire safety will be a central focus. Most marginal players and many buying houses exploiting them will disappear. An industry consolidation will take place.

We still feel that in spite of all the problems, Bangladesh has a long term competitive advantage, and extensive needlework experience, which cannot be easily substituted by any other country in the near future. RMG is definitely a sector which is highly beneficial for the Bangladeshi workers.

The net revenue of the Textile Division increased and other division's revenues slightly decreased during the year.

# **Domestic and Export Sales**

Net sales during the period had increased compared to last year (Jan – Dec 2015).

#### **Earnings Per Share** 3.14

This has been calculated in compliance with the requirements of BAS 33: Earnings Per Share by dividing the basic earnings by the weighted average number of ordinary shares outstanding during the year.

### **Basic Earnings (Numerator)**

This represents earnings for the year attributable to ordinary shareholders. As there was no preference dividend, extra ordinary items, the net profit after tax and Non-controlling (Minority) interest for the year has been considered as fully attributable to the ordinary shareholders.

# Weighted Average Number of Shares in Issue (Denominator)

This represents the number of ordinary shares outstanding at the beginning of the year plus the number of ordinary shares issued during the year multiplied by a time-weighting factor. The time-weighting factor is the number of days the specific shares are outstanding as a proportion of the total number of days in the years. However, the Bonus Shares issued during the year were treated as if they always had been in issue. Hence, in computing the Basic EPS, the total number of bonus shares has been considered.

### **Earlier Periods**

The number of shares outstanding before the bonus shares issue has been adjusted for the proportionate change in the number of shares outstanding as if the bonus issues had occurred at the beginning of the earliest periods reported, and accordingly, in calculating the adjusted EPS of earlier periods, the total number of shares including the subsequent bonus issue in current year has been considered as the Weighted Average Number of Shares Outstanding during the earlier periods.

The basis of computation of number of shares as stated above, is in line with the provisions of BAS 33: Earnings Per Share. The logic behind this basis, as stated in the said BAS is that the bonus shares are issued to the existing shareholders without any consideration, and therefore, the number of shares outstanding is increased without an increase in resources generating new earnings.

# **Diluted Earnings Per Share**

No diluted EPS is required to be calculated for the year as there was no scope for dilution during the year under review.

#### 3.15 **Foreign Currency Translations**

Foreign currency transactions are recorded at the applicable rates of exchange ruling at the transaction date.

As at and for the year ended 30 June 2017

#### 4.00 **Financial risk management**

The company management has overall responsibility for the establishment and oversight of the company's risk management framework. Risk management policies, procedures and systems are reviewed regularly to reflect changes in market conditions and the company's activities. The company has exposure to the following risks from its use of financial instruments.

- · Credit risk
- Liquidity risk
- Market risk

### **Credit risk**

Credit risk is the risk of a financial loss to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the company's receivables. Management has a credit policy in place and exposure to credit risk is monitored on an ongoing basis. Risk exposures from other financial assets, i.e. Cash at bank and other external receivables are nominal.

#### 4.02 Liquidity risk

Liquidity risk is the risk that the company will not be able to meet its financial obligations as they fall due. The company's approach to managing liquidity (cash and cash equivalents) is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the company's reputation. Typically, the company ensures that it has sufficient cash and cash equivalents to meet expected operational expenses, including financial obligations through preparation of the cash flow forecast, prepared based on time line of payment of the financial obligation and accordingly arrange for sufficient liquidity/fund to make the expected payment within due date.

In extreme stressed conditions, the company may get support from the related company in the form of short term financing.

#### 4.03 **Market risk**

Market risk is the risk that any change in market prices such as foreign exchange rates and interest will affect the company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters.

#### (a) Currency risk

The company is exposed to currency risk on certain revenues and purchases such as revenue from foreign customers and import of raw material, machineries and equipment. Majority of the company's foreign currency transactions are denominated in USD and EURO and relate to procurement of raw materials, machineries and equipment from abroad.

#### (b) Interest rate risk

Interest rate risk is the risk that arises due to changes in interest rates on borrowing. There was no foreign currency loan which is subject to floating rates of interest. Local loans are, however, not significantly affected by fluctuations in interest rates. The company has not entered into any type of derivative instrument in order to hedge interest rate risk as at the reporting date.

Weighted Average Number of Shares in Issue (Denominator)

As at and for the year ended 30 June 2017

### **Current year**

This represents the number of ordinary shares outstanding at the beginning of the year plus the number of ordinary shares issued during the period multiplied by a time-weighting factor. The time-weighting factor is the number of days the specific shares are outstanding as a proportion of the total number of days in the year. However, the Bonus Shares issued during the Period were treated as if they always had been in issue. Hence, in computing the Basic EPS, the total number of bonus shares has been considered.

## **Earlier periods**

The number of shares outstanding before the bonus shares issue has been adjusted for the proportionate change in the number of shares outstanding as if the bonus issues had occurred at the beginning of the earliest periods reported, and accordingly, in calculating the adjusted EPS of earlier periods, the total number of shares including the subsequent bonus issue in current year has been considered as the weighted Average Number of Shares Outstanding during the earlier periods.

The basis of computation of number of shares as stated above is in line with the provisions of BAS 33 Earnings Per Share. The logic behind this basis, as stated in the said BAS is, that the bonus shares are issued to the existing shareholders without any consideration, and therefore, the number of shares outstanding is increased without an increase in resources generating new earnings.

## **Diluted Earnings Per Share**

No diluted EPS is required to be calculated for the year as there was no scope for dilution during the year under review.

### 35.00 Financial Risk Management

The company management has overall responsibility for the establishment and oversight of the company's risk management framework. Risk management policies, procedures and systems are reviewed regularly to reflect changes in market conditions and the company's activities. The company has exposure to the following risks from its use of financial instruments.

- (a) Credit risk
- Liquidity risk (b)
- (c) Market risk

As at and for the year ended 30 June 2017

#### 35.01 Credit Risk

Credit risk is the risk of a financial loss to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the company's receivables. Management has a credit policy in place and exposure to credit risk is monitored on an ongoing basis. Risk exposures from other financial assets, i.e. Cash at bank and other external receivables are nominal.

### 35.02 Liquidity Risk

Liquidity risk is the risk that the company will not be able to meet its financial obligations as they fall due. The company's approach to managing liquidity (cash and cash equivalents) is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the company's reputation. Typically, the company ensures that it has sufficient cash and cash equivalents to meet expected operational expenses, including financial obligations through preparation of the cash flow forecast, prepared based on time line of payment of the financial obligation and accordingly arrange for sufficient liquidity/fund to make the expected payment within due date.

In extreme stressed conditions, the company may get support from the related company in the form of short term financing.

#### 35.03 Market Risk

Market risk is the risk that any change in market prices such as foreign exchange rates and interest will affect the company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters.

#### Currency Risk (a)

The company is exposed to currency risk on certain purchase such as import of raw material, machineries and equipment. Majority of the foreign currency transactions are denominated in USD and relate to procurement of raw materials, machineries and equipment from abroad.

#### (b) Interest Rate Risk

Interest rate risk is the risk that arises due to changes in interest rates on borrowing. There was no foreign currency loan which is subject to floating rates of interest. Local loans are, however, not significantly affected by fluctuations in interest rates. The company has not entered into any type of derivative instrument in order to hedge interest rate risk as at the reporting date.

### 36.00 Events after the Reporting Period

- Subsequent to the Statement of Financial Position date, The directors recommended 5% cash (i.e. Tk. 0.50 per share) and 5% Stock dividend (i.e. 5 shares for every 100 shares held) for the year ended 30 June 2017. The dividend proposal is subject to shareholders' approval at the forthcoming annual general meeting.
- (b) Except the above fact, no circumstances have arisen since this statement of Financial Position date which would require adjustments to, disclosure in, the financial statements or notes thereto.

The company's approach to managing liquidity (cash and cash equivalents) is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the company's reputation. Typically, the company ensures that it has sufficient cash and cash equivalents to meet expected operational expenses, including financial obligations through preparation of the cash flow forecast, prepared based on time line of payment of the financial obligation and accordingly arrange for sufficient liquidity/fund to make the expected payment within due date.

In extreme stressed conditions, the company may get support from the related company in the form of short term financing.

#### **Market Risk**
